
Recherche Data Gouv : Building a sovereign and trusted infrastructure for sharing and reusing research data

Véronique Stoll*†¹

¹MESR – MESRI – France

Résumé

Recherche Data Gouv (<https://recherche.data.gouv.fr/en>) provides France's national framework for sharing and reusing research data. Anchored in the principles of sovereignty, quality, and trust, it is tailored to the specific landscape of French research.

The initiative is built on two pillars: a shared infrastructure and dedicated support for research teams through competence centers. By bringing together all stakeholders in the data ecosystem, it strengthens collaboration and promotes the long-term value of research data.
